SOLID   MySQL

PERSONAL PROJECTS

Catagram ↗
Graduation project - Instagram for cats. Stack: React, Redux, TypeScript. Implemented a feed of posts, pagination, search, stories, the ability to like and view this list, changing the theme and more. Node/MongoDB is also connected with the possibility of registration and authorization.

Training project to learn typescript, react, redux ↗
This project was used to learn react, redux and typescript. The styled-components, material UI, axios, react-spinners, react-router-dom, react-icons libraries were used.

NBRB project ↗
A project using the API of the National Bank of the Republic of Belarus. The values of some currencies for today are displayed. It is also possible to choose any currency that has ever existed in Belarus and display a chart of exchange rates for any period of time.

Pokemons project ↗
List of Pokemon (with pagination) and detailed information on each Pokemon based on the PokeAPI.
